## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 1-8 are pending.
2. Claims 1-4 are elected and rejected.
3. Claims 5-8 are non-elected and withdrawn from further consideration.

### ***Election/Restrictions***

4. Applicant's election with traverse of Group I, corresponding to claims 1-4, which are directed to compounds, in Paper No. 7 is acknowledged. In addition, the compound of 4-chloro-2-(4-chloro-2,6-dimethyl-phenoxy)-3,6-dimethyl-pyridine was elected as a species, however these compounds were found in the prior art. The traversal is on the ground(s) that Groups I and II should be examined together. This is not found persuasive because the compounds of Group I can be made by different reactive processes than those that are instantly claimed, such as by changing the reactive steps and also by using different reagents and reaction parameters.
5. The requirement is still deemed proper and is therefore made FINAL.

### ***Priority***

6. If applicant desires priority under 35 U.S.C. 120 based upon a previously filed copending application, specific reference to the earlier filed application must be made in the instant application. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph. The status of nonprovisional

Art Unit: 1614

parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. \_\_\_\_\_" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

If the application is a utility or plant application filed on or after November 29, 2000, any claim for priority must be made during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2) and (a)(5). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) a surcharge under 37 CFR 1.17(t), and (2) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Commissioner may require additional information where there is a question whether the delay was unintentional. The petition should be directed to the Office of Petitions, Box DAC, Assistant Commissioner for Patents, Washington, DC 20231.

***Oath/Declaration***

7. A new oath or declaration is required because the reference to Serial No. 09/254,387 in the declaration has an improper filing date of June 6, 1995 instead of March 4, 1999. The wording of an oath or declaration cannot be amended. If the wording is not correct or if all of the required affirmations have not been made or if it has not been properly subscribed to, a new oath or declaration is required. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

***Claim Rejections - 35 USC § 112***

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons support this rejection. The compound of formula IV has the variable of A representing the moiety of CH<sub>3</sub>, in which case the valence state of the carbon atom of CH<sub>3</sub> would be exceeded in the phenyl ring. When the variable of R<sub>4</sub> is C<sub>1</sub>-C<sub>4</sub> alkyl, it is stated that this group "may optionally independently contain one double or triple bonds." However, the fact that an alkyl group can only possess single bonds, not double and triple bonds, presents ambiguity to the claim. All of these issues are unclear and thus render the claims vague and indefinite.

10. Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

11. Claim 3 recites the limitation "then B" is  $-NR_1R_2$ ,  $-NHR_1R_2$ ,  $-OCHR_1R_2$  or cyano" in 23 and 24. There is insufficient antecedent basis for this limitation in the claim.

12. Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

13. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 3 recites the broad recitation "an electron deficient group", and the claim also recites "such as  $NO_2$ ," which is the narrower statement of the range/limitation.

Art Unit: 1614

14. Regarding claim 3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

15. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

16. Claims 1-4 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Chen of WO 95/33750 possessing a publication date of December 14, 1995. Chen teaches of the corticotropin-releasing factor antagonist compounds and pharmaceuticals of formula (IV, XI and X), (see abstract and claims 15-18).
